Summary

Android Developer skilled in designing, developing, and maintaining high-quality mobile applications using Kotlin and Java. Proficient in modern Android architecture (MVVM), Jetpack components, REST API integration, and performance optimization. Strong problem-solver focused on delivering robust and user-friendly solutions.

Education

B.Tech in Information Technology - **Vishwakarma Institute of Technology, Pune** | 06/2022 - 06/2026 | Cgpa: **8.52/10**

HSC - **Sir Parshurambhau College, Pune** | 2020 - 2022 | Percentage: **79.33%**, MHT-CET Percentile: **97.86**

Experience

Android Developer Intern - Mobishaala

09/24 - 02/25

Built a real-time conversational voice bot integrating Deepgram STT and Lmnt TTS via WebSockets using OkHttp; optimized for byte-stream audio and Acoustic Echo Cancellation, connecting to OpenAI/Gemini API via RAG and Coroutines, reducing response time by **70–80%**.

Developed a book-conversational Android application using MVVM architecture, Room database, XML UI, and Cashfree payments; integrated the voice bot for interactive book discussions.

Migrated legacy Kotlin Android extensions to ViewBinding and resolved dependency issues by updating libraries from JCenter to Maven Central/JitPack, improving code stability and reducing maintenance overhead.

AI Software Development Intern (AI + Android) - Eduplus Campus

07/24 - 12/24

Designed and developed an Android application using CameraX to capture and digitize handwritten answer sheets, integrating with a Flask backend via OkHttp/Retrofit and Kotlin Coroutines for asynchronous communication.

Implemented automated grading workflow that leveraged GOT-OCR for text extraction and MiniLM embeddings for semantic similarity evaluation, achieving **92%** recognition accuracy and reducing manual grading time by **90%**.

Utilized WorkManager to handle reliable background PDF uploads and retries, syncing evaluated results back to the Android app for review and publishing, streamlining the grading process for educators.

Projects

AI-Powered Learning Management System (Kotlin, MVVM, Firebase, OkHttp)

Engineered a mobile-first Android LMS application with Kotlin and MVVM, enabling student login (Firebase Auth), chapter/answer uploads, PDF viewing, and real-time score dashboards with efficient REST API calls (OkHttp + Coroutines).

Developed AI-driven assessment modules, including an AI Viva module with voice cloning (LMNT-TTS) and speech recognition, and an AI Proctoring system (YOLOv8 inference) integrated via low-bandwidth Android streams.

Implemented a dual-backend architecture (Flask for AI, Node.js for authentication) with secure REST API communication from Android, providing AI-generated feedback and viva reports.

VitalLink — Android Health Monitor (Kotlin, Koin, Firebase, MPAndroidChart)

Developed an Android application integrating with an ESP32 device via lightweight REST API for real-time ECG and SpO₂ monitoring, using OkHttp, Coroutines, and LiveData for smooth UI updates.

Visualized continuous physiological data with MPAndroidChart and architected the app using Koin for dependency injection, ensuring clean module separation and testability.

Implemented a smart alert system with WorkManager and push notifications for medically-unsafe thresholds and streamed data to Firebase Realtime Database for remote monitoring and historical analysis.

Skills

Programming Languages: Kotlin, Java

Frameworks Libraries: Android SDK, Android Studio, Jetpack (ViewModel, LiveData, Room, WorkManager, Navigation), Coroutines, Flow, MVVM, Koin, OkHttp, CameraX, MPAndroidChart, Retrofit

Databases: Room, SQLite, Firebase Realtime Database, Firebase Firestore

Tools: Git, Firebase (Authentication, Cloud Messaging, Analytics)

Concepts: REST APIs, JSON Parsing, Material Design, Dependency Injection, Asynchronous Programming, Unit Testing, Code Reviews, Agile Methodologies, OOP, Problem Solving

Achievements

2nd place at IEEE SPIT HackXplore Hackathon, **1st** place Track Winner at QUASAR **3.0** Hackathon

Ranked **416 / 73K** participants in Amazon ML Challenge **2024**, Ranked **~3000** participants in Amazon ML Challenge **2025**

Certifications and Publications(IEEE)

SmartGrade: Automated Assessment with Cheat Detection

SaraIMarathi: A Regional Language Summarizer Using LLM
